odločanja v mednarodnih organizacijah in aktov, ki jih sprejemajo; pravni in politični učinki njihovega odločanja in sploh vloga mednarodnih organizacij v mednarodnem življenju, pa tudi razmejitev mednarodnih organizacij od NGO; posebna vprašanja delovanja t. i. mednarodnih organizacij z nacionalnimi pooblastili.

Glede na razvoj v mednarodnem življenju v zadnjih nekaj letih bo poseben poudarek dan vidikom novim razmerjem moči. Sodobni mednarodni red namreč ne opredeljujejo predvsem ravnotežje moči med silami Zahodnega sveta, kar je bilo dominantno razmerje v Svetovnem redu v preteklih 300 letih. Na sedanjem še zlasti pa v bodočem svetu ne bo šlo več za ravnotežje med silami Zahodnega sveta (evropskimi velikimi silami), pač pa dejansko za ravnotežje moči med historičnimi središči različnih civilizacij. "Mutatis mutandis" gre prav za tisto, kar je nakazoval v svojih razmišljajih o spopadih med civilizacijami (Samuel Huntington). V tem kontekstu vse bolj stopa v ospredje potreba po reformi sistema OZN. Nekaterih sodobnih konfliktih (Sriija, Yemen, Libija in še zlasti agresija na Ukrajino) je bilo delovanje OZN potisnjeno na obrobje. Kot vedno v zgodovini bo verjetno prav po zaključku agresije na Ukrajino čas za resno prenovo mednarodnega sistema kolektivne varnosti. Sedanji sistem je obvaroval človeštvo pred 3. svetovno vojno, vendar so potrebni razmisleki o njegovi reformi predvsem z vidika omejevanja suverenosti držav in večje izpostavljenosti v mednarodnem redu solidarnosti.

Kot posebna vprašanja bodo obravnavane na temelju njihovih ustanovnih aktov OZN, NATO, Specializirane agencije OZN, OVSE ter IAEA. Pri OZN bodo posebej izpostavljena vprašanja v zvezi z varovanjem miru (delovanje in problemi VS OZN), varstvo človekovih pravic, uresničevanje pravice narodov do samoodločbe, razorožitve, problemi reforme OZN, še posebej VS OZN ter vloga OZN pri

characteristics of their organizational structure; general characteristics of decision-making in international organizations and the acts they adopt; the legal and political effects of their decision-making and in general the role of international organizations in international life, as well as the demarcation of international organizations from NGOs; specific performance issues t. i. international organizations with national mandates.

Considering the developments in international life in the last few years, special emphasis will be given to aspects of new power relations. The modern international order is not primarily defined by the balance of power between the powers of the Western world, which was the dominant relationship in the World Order in the past 300 years. In the present and especially in the future world, it will no longer be a matter of balance between the powers of the Western world (European great powers), but actually a balance of power between the historical centers of different civilizations. "Mutatis mutandis" is exactly what he was suggesting in his thoughts on the clash of civilizations (Samuel Huntington). In this context, the need to reform the UN system is increasingly coming to the fore. In some modern conflicts (Syria, Yemen, Libya, and especially the aggression against Ukraine), the activities of the UN have been pushed to the periphery. As always in history, it will probably be right after the end of the aggression against Ukraine that it will be time for a serious overhaul of the international system of collective security. The current system has protected humanity from the 3rd World War, but it is necessary to reflect on its reform, especially from the point of view of limiting the sovereignty of states and greater exposure in the international order of solidarity.

Special topics will be addressed as specific issues under their founding acts, the UN, NATO, the UN Special Agency, the OSCE and the IAEA. At the UN, special emphasis will be placed on issues related to peacekeeping (functioning and problems of the UN Security Council), protection of human rights, realization of the right of nations to self-determination, disarmament, problems of UN

razvoju in kodifikaciji mednarodnega prava. Pri NATO bo posebna pozornost dana sprejemanju odločitev, opredelitvi »casus foederis« in »branjenega območja« v Washingtonski pogodbi, ter novim političnim in pravnim vidikom vloge NATO v svetu in njegovem delovanju v okviru pooblastil VS OZN.

Pri specializiranih agencijah bo poudarek na njihovi vlogi v sodobnem svetu in vprašanjih njihove vpetosti v sistem OZN.

V okviru problematike OVSE bo poudarek na vprašanju njene pravne osebnosti, načinu odločanja in naravi njenih odločitev in njeni vlogi v Evropi.

njihova pravna narava; glavne vrste

Pri IAEA bo v ospredju pravna problematika njene vloge in nadzora pri preprečevanju proliferacije jedrskega orožja

reform, especially the UN Security Council and the role of the UN in developing and codifying international law. At NATO, special attention will be paid to decision-making, the definition of "casus foederis" and "protected area" in the Washington Treaty, and new political and legal aspects of NATO's role in the world and its operation within the UN Security Council.

The specialized agencies will focus on their role in the modern world and the issues of their integration into the UN system.

In the context of the OSCE, the emphasis will be on the issue of its legal personality, the manner of decision-making and the nature of its decisions, and its role in Europe.

their legal nature; main species

The IAEA will focus on the legal issues of its role and control in preventing the proliferation of nuclear weapons.
