Cilji in kompetence:

Program je zasnovan za izobraževanje javnih uslužbencev na različnih področjih dela v javni upravi. Študenti na FDŠ pa ne dobijo le splošnih znanj o državi in njeni upravi, temveč se podrobno seznanijo še z etičnimi, varnostnimi, obrambnimi ter strateškimi vprašanji, katerih poznavanje je nujno za celovito razumevanje države v današnjem post-modernem svetu. Pridobili bodo naslednje kompetence:

sposobnost in razvoj kritičnega mišljenja pri obravnavi temeljnih vprašanj, procesov in problemov, sposobnost prehoda od opisnega načina učenja do analitičnega učenja s poudarkom na samokritičnem mišljenju, razumevanje nujnosti nevtralnega svetovnonazorskega pristopa pri reševanju problemov v javni upravi, izboljšanje sposobnosti odločanja o temeljnih dilemah

Objectives and competences:

The programme is designed to train civil servants in different areas of work in the public administration. Students at the FDŠ not only gain a general knowledge of the state and its administration, but also an in-depth understanding of ethical, security, defence and strategic issues, knowledge of which is essential for a comprehensive understanding of the state in today's post-modern world. They will acquire the following competences:

The ability and development of critical thinking in dealing with fundamental issues, processes and problems, the ability to move from descriptive learning to analytical learning with an emphasis on self-critical thinking, an understanding of the necessity of a neutral world-view approach to problem-solving in public administration, an improvement of the ability to make decisions on the fundamental

slovenske družbe v konkretnih primerih, vključevanje pridobljenega znanja v delovni proces in reševanje delovnih nalog, sposobnost predanega samostojnega dela in njegove samorefleksije, sposobnost skupinskega dela in odločanje ter mreženja na strokovnem področju, sposobnost iskanja rešitev in njihove uporabe v praksi, razvoj sposobnosti pisanja strokovnih prispevkov na visoki strokovni ravni.

dilemmas of Slovenian society in concrete cases, integration of the acquired knowledge into the working process and solving work tasks, the ability to work independently and to self-reflect, the ability to work in teams and to make decisions and network in the professional field, the ability to find solutions and to apply them in practice, the development of the ability to write professional papers at a high professional level.

Predvideni študijski rezultati:

Študentje bodo spoznali zakonitosti delovanja slovenskega nacionalnega varnostnega sistema in njegovo vpetost v mednarodno varnostno okolje v organizacijah katerih članica je RS. Poudarek bo na Evropski uniji in zvezi Nato, ki sta temelj skupnega delovanja na področju varnosti, obrambe (in vojaštva). Ruski vojaški napad na Ukrajino je pomembno spremenil varnostno (ne)ravnovesje v globalnem svetu in postavil vse pred nove izzivi. Odziv EU in njene skupne varnostne in obrambne politike je v večjih prizadevanjih za krepitev odvrčalne države kar se kaže predvsem v krepitevi njene obrambne industrije. Zaveznitvo podobno krepi svoje zmogljivosti in prednosti s pospeševalnikom inovacij in pobudo DIANA. Študentje se bodo seznanili z najnovejšimi trendi in prizadevanji mednarodnega okolja pri iskanju novega ravnovesja sil ter izzivi s katerimi se srečujemo državljani RS in EU.

Intended learning outcomes:

Students will learn about the legality of the functioning of the Slovenian national security system and its integration into the international security environment in the organisations of which the Republic of Slovenia is a member. The focus will be on the European Union and NATO, which are the foundations of common action in the field of security, defence (and military). The Russian military attack on Ukraine has significantly changed the security (im)balance in the global world and presented new challenges to all. The response of the EU and its Common Security and Defence Policy is to step up its efforts to strengthen deterrence, which is reflected in particular in the strengthening of its defence industry. Similarly, the Alliance is reinforcing its capabilities and strengths through the Innovation Accelerator and the DIANA initiative. Students will learn about the latest trends and efforts of the international environment in the search for a new balance of power and the challenges we face as citizens of the RS and the EU.
